Tinoki, is an online store of baby clothes and accessories.

The story began when a mother (the designer, Mélanie Preszow) At the dawn of the winter season, could not find exactly what she was looking for on the net to dress and quickly transport her 4month-old baby from bed to the car seat, without having to undress him or take off his big coat! (because car seat straps/harnesses are not stretchy enough) ... according to road safety standards

that's when she decided to imagine it and make it herself and that's how it was born and has become today the brand's best-seller: the **Nokistar** : The star suit that keeps baby warm in all circumstances and adapted to meet road safety instructions :)

The entire **Tinoki** collection is made in **integration workshop** located in Cambrai. Mélanie wants to contribute to the local economy by maintaining employment and creating value in our regions. ■ ■
